LETTER OF TRANSMITTAL

Helena, Montana  
December 1, 1960

The Honorable J. Hugo Aronson  
Governor of Montana  
The Capitol  
Helena, Montana

Dear Governor Aronson:

In compliance with Section 75-1309 of the Revised Codes of Montana, 1947, I have the honor of submitting to you the biennial report of the Superintendent of Public Instruction.

Respectfully,

HARRIET MILLER

Superintendent of  
Public Instruction

# FOREWORD

The minimum contents of the Biennial Report of the Superintendent of Public Instruction are set forth in Section 75-1309, R.C.M., 1947. The contents thus outlined provide useful information for all officials concerned with schools and school finance, at the district, county and state levels.

In recent years, the Superintendent's Biennial Report has come to serve the added purpose of providing information for studies, surveys and publications of private agencies, both within and without Montana's borders. It is also used for reference by federal agencies concerned with various aspects of state educational programs.

To meet the need for a basic reference as to the operations of the Office of Superintendent of Public Instruction, the 1958 Biennial Report of the Superintendent included a review of each of the major activities of the Office. Such a review is not included in the 1960 Report; it is planned for 1962.

Meanwhile, the descriptive portion of the 1958 Report is expected to remain sufficiently useful for general inquiry purposes, since the only major operational changes which have taken place in the interim are those brought about by the National Defense Education Act of 1958, and those relating to the discontinuation of the Montana Fish and Game Commission's grant for conservation education and the institution of aviation education under a grant from the Montana Aeronautics Commission.

Postponed also until 1962 is a review of the accomplishments in curriculum development, in departmentalizing the operations of the Superintendent's office, and in other activities connected with improvement and progress in education. While such a review at this time would be of interest, it is felt that these matters can be treated adequately in the next Report, and postponement makes it possible to keep the current Report to a minimum in size and content.

The Appendix to this Report includes, in brief form, certain current information not readily available elsewhere. New, and of particular interest, is the listing of official publications of the Department of Public Instruction.

Perhaps the most significant material in this Report is that pertaining to school finance. The Introduction to Education Statistics indicates the work that is underway to improve financial operations and record-keeping at all levels. The Recommendations include a number of vitally-important steps that should be taken to meet present problems.

It is hoped that this Report, together with the 1958 Report, will serve to develop better understanding of the functions of the Office of Superintendent of Public Instruction as prescribed by the Constitution and laws of the State of Montana, and to promote renewed efforts to achieve greater progress for Montana schools.

# RECOMMENDATIONS CONCERNING EDUCATION IN MONTANA

By HARRIET MILLER

Superintendent of Public Instruction

Section 75-1309, R.C.M., 1947, which prescribes the contents of the biennial report of the Superintendent of Public Instruction, includes "such general matters, information, and recommendations relating to the educational interest of the state as he may deem important."

I deem important the matters to be listed here. Therefore, for the good of Montana education, I recommend:

**1. That the statutes governing school finance be thoroughly reviewed and revised with the objectives of simplifying operations, bringing procedures up to date, and eliminating conflicts which have resulted from piecemeal adoption of laws relating to school finance.**

The multiplicity of school funds, budgets, tax levies, accounts and financial reports required by present laws is out of keeping with operational reality. School officials at every level are unduly burdened with detail which, while prescribed by present laws, could be reduced, simplified, and in some instances eliminated by corrective legislation, without lessening the safeguards set up for public monies.

Montana would do well to review the experience of other states where school finance is simplified to the point of having only two school district funds—a fund for all operational costs and a fund for major capital outlay. Now, Montana school districts have as many as ten operating funds plus a building fund. The establishment of a single operating fund for Montana school districts could be of great benefit in solving such problems as lack of a legal reserve in any but the General Fund and Bus Depreciation Fund, necessitating extra-legal "borrowing" between funds and fostering disregard for the separation of monies derived from different tax sources, as required by law. Meanwhile, until study of such possibilities can be completed and a thorough plan for revision recommended, some corrective measures are urgently needed. These are listed in the specific recommendations which follow. Further

a general revision is needed immediately, of statutes dealing with budget and tax levy procedures, to clarify the intent of existing laws and eliminate conflicts of laws, both with other laws and with long-established procedures. School district levies, federal funds, state public school equalization funds and county school equalization funds are the subjects of statutes requiring revision.

**2. That the statutes dealing with emergency budgets for school districts be amended to provide for bona fide emergencies not now included, to provide specifically for the adoption of emergency budgets for any of the regular, budgeted funds of the district, and to provide for state participation in the financing of emergency budgets necessitated by increased enrollment.**

Emergency budget laws have not been revised to keep pace with changing needs or with changing methods of school financing. As a result, a school district today can be faced with a true emergency situation not contemplated by statutes enacted thirty years ago, and not covered adequately by these statutes.

Montana no longer has a static population; the unexpected is occurring with increasing frequency. School districts must be enabled to meet new and sudden problems, whatever those problems may be. A broadening of the emergency budget laws is urgently needed.

**3. That specific requirements be enacted to insure proper accounting for each of the budgeted funds for the elementary school(s) of a district, each of the budgeted funds for the high school(s) of a district, and each of the budgeted funds for county high schools.**

With Montana school finance approaching a \$70-million-a-year operation, the intent of present laws governing the accounting of school funds no longer should be ignored at any level. Statutory requirements more specifically detailing the intent of present laws could help in achieving improvement in the keeping of school financial records.

**4. That budgeting and accounting procedures for joint school districts be simplified and that present laws be amended to eliminate sources of misunderstanding and conflict.**

School budgeting procedures at best are cumbersome; where joint school districts exist, budget procedures are all but unworkable.

For each joint school district budget, the county superintendent of the counties sharing the joint district must engage in a series of six detailed communications in the brief period between July 10 and August 5.

Further, a joint district's budget must be computed in three ways by each county superintendent, a procedure requiring as many as 125 mathematical operations. Until the joint district budget data is completed, a county superintendent cannot complete the budgets for any of the other school districts in the county, and as a result, failure by another county superintendent to provide essential data can affect the budget work for all of the school districts in the adjoining county.

These problems of themselves need attention. Also, the existence of these problems is a real deterrent to consolidation where county boundaries happen to fall between school districts otherwise favorably disposed toward consolidation. Simplification of joint district budgeting procedures, therefore, can be expected to accelerate the voluntary consolidation of school districts in adjoining counties.

**5. That the school transportation program, state-wide, be reviewed in light of present needs, problems, adequacy of financing procedures, and the experience of other states in simplifying provisions for state aid for transportation.**

While comprehensive recommendations should be made only after a thorough study, immediate action by the Legislature is imperative to provide relief for school districts in the matter of financing transportation by amending the present law (Section 75-3414, R.C.M., 1947) restricting the transportation budget for the ensuing year to that amount supported by contracts signed at budget time. This statute, which also governs the school district tax levy for transportation, needs further amendment to permit a district to carry over into the next fiscal year sufficient cash to meet its obligations in the period before receipt of tax revenues or county or state reimbursement. In view of operational realities, these changes are urgently needed.

**6. That the social security payments made by school districts (and county high schools) be budgeted for and paid from the Retirement Fund, rather than from the General Fund as at present.**

Social security costs are mandatory upon the district, and should not work to reduce the effective Foundation Program for the schools, but should be paid from a mandatory levy in such manner as the district's costs for Teachers' Retirement and Public Employee's Retirement are paid.

**7. That provisions governing payment of state public school equalization funds be clarified and brought into agreement, and that existing provisions which are in conflict with the requirements of Public Law 874 be repealed.**

With the immediate prospect of more and more school districts becoming affected by situations involving federal impact, it is important to prevent any hardship to districts eligible for both Public Law 874 funds and state public school equalization funds. In this connection, Section 75-3616, R.C.M., 1947, particularly is outmoded and needs revision.

**8. That provision be made for school districts which cease to operate a school to budget and account for district expenditures and revenues from a single fund during the period of non-operation.**

Specific provision also needs to be made for the financial procedures of districts which have budgeted for school operation, but which in the course of the budgeted period find it necessary to close (or not open) the school budgeted for. Such non-operating districts should be enabled to simplify their financial procedures.

**9. That obsolete provisions for a tax levy for textbooks be repealed.**

**10. That statutes pertaining to kindergartens operated by school districts be clarified, particularly with respect to financial support.**

Sections 75-2005, 75-3611 and 75-3612, R.C.M., 1947, should be brought into agreement on the matter of financing kindergarten costs.

**11. That at least the same requirements be established for a newly-opened school as now exist for a re-opened school, with respect to eligibility for participation in the Foundation Program for county and state aid.**

Section 75-3611, R.C.M., 1947, should be amended to include new schools in the provision which requires, for re-opened schools, an enrollment of at least five and petitions from parents of at least three children, for Foundation Program aid.

**12. That the provisions governing Average Number Belonging for budget purposes be amended to provide for above-average population influx and/or enrollment increase due to causes other than the closing of a neighboring school.**

Section 75-3611, R.C.M., 1947, needs to be amended in this respect to permit a school district to budget for its responsibilities to educate children whose presence in the district may be brought about by such activity as the missile-base program and other defense-related activity. This budgeting amendment is needed also to permit a district to budget more adequately for the use of federal impact funds paid by the federal government for the education of such children.

**13. That provision be made to alleviate the hardship now faced by a growing one-teacher school in the year when it first becomes necessary to employ two teachers, but is prevented from using the two-teacher Foundation Program rate because the Average Number Belonging in the preceding year was less than 18.**

This restriction, which even now adversely affects districts with a normal rate of growth, represents a potential problem of extreme seriousness for those small schools where missile-base construction may be expected to double or triple enrollments, necessitating application for Public Law 874 funds. An amendment to Section 75-3612, R.C.M., 1947, is needed.

**14. That the same Foundation Program provisions be applied to high schools as now exist for elementary schools with respect to the allowable amount for schools operated within the incorporated limits of a city or town.** Sections 75-3612 and 75-4507, R.C.M., 1947, need clarification.

**15. That the Foundation Program law be amended to remove the penalty which now exists for schools operating 186 days.**

This can be accomplished by removing from Section 75-3611, R.C.M., 1947, the 185-day divisor in the formula for calculating the Average Number Belonging for schools operating more than 185 days. With ever-increasing efforts to improve the

school program, no school should be hampered financially because the trustees see fit to increase the time used for school purposes.

**16. That specific provision be made to restrict the distribution of Interest and Income funds at the county level to those districts which operate a school for at least the minimum period.** An amendment to Section 75-2203, R.C.M., 1947 is needed.

**17. That the statutory tuition rates be reviewed with the objective of more adequately compensating the educating district for the cost of services provided pupils who are not residents of the district.** The review should include tuition rates at vocational centers and junior colleges.

**18. That the financial problems connected with special education programs be thoroughly reviewed, with the objective of providing a more adequate educational program for Montana's handicapped children.**

At present, only about 400 handicapped children are being provided with special education by Montana's school districts, whereas there are some 20,000 children in the state who need education other than that offered by the regular school program.

While state reimbursement for special education has been increased, a great need remains to be met. Thoughtful consideration by the Legislature is urged, in order that Montana may better meet its obligation than at present, with only one in fifty handicapped children being provided with opportunities suited to his needs.

As an immediate step in this direction, Section 75-5003, R.C.M., 1947, should be amended to require the payment of tuition by the district of the handicapped child's residence to the district in which the child is enrolled in a special education class.

**19. That the Legislature continue to permit local school boards to exercise the right to apply for and receive federal funds under the National Defense Education Act, by continuing to provide the administrative funds necessary for Montana to meet requirements for N.D.E.A. participation.**

**20. That, in considering the needs of the schools of Montana, first: at least enough state funds be appropriated to meet the state's entire obligation**

**under the Foundation Program law; second: the present Foundation Program schedules be amended to reduce the inequities which exist between schools of different size and between elementary and high schools; and third: unless the state is prepared to grant adequate funds for its share of the Foundation Program, that needed increases in school budgeting authorization be provided not by increasing the Foundation Program schedule without a corresponding increase in state appropriation (resulting in increased but hidden costs to local taxpayers), but rather by increasing the amount of the permissive expenditure beyond the Foundation Program.**

It is evident from factual data that the Foundation Program is far from adequate, except for a very few of the smallest schools. It is also apparent that the State of Montana has tended to shift the responsibility for school financing in the direction of the local taxpayers, too often in the form of school district levies imposed to make up for the state's deficiency in meeting the obligations imposed by the Foundation Program law.

Montana schools need more adequate sources of revenue. This need cannot be met, and should no longer be disguised, by mere paper increases in the Foundation Program which are unmatched by state funds. More state money for schools is a pressing need. Authorization for school districts to adopt more adequate budgets is also urgent. These are two separate problems, however, and unless enough state money is appropriated to pay the state's share of an increased Foundation Program schedule (which increased schedule would authorize more adequate school budgets), increased budget authorization should be provided through an increase in the permissive amount of the school district general fund budget; such an increase would be financed straightforwardly and openly by district tax levies. On the other hand, an increase in the Foundation Program schedule without increased state aid actually would be financed by the district as a district levy for the state's deficiency, but this increased cost to the district would be hidden within the Foundation Program.

Wider understanding of school district tax obligations should serve to promote greater effort to improve methods of financing Montana schools.

As stated in the 1958 Biennial Report, three considerations are basic to the search for improvement of Foundation Program operation:

1. The application of a common, statewide standard for taxation of real property;
2. The equitable allocation of costs of education for all Montana youth;
3. The achievement of efficiency and economy in school operation to the greatest extent possible in keeping with the needs of the people and their ability and willingness to pay.

**21. That Montana extend and increase its participation in the program of the Western Interstate Commission for Higher Education as a means of providing more educational opportunities for Montana youth in the fields of medicine, dentistry and veterinary medicine.**

**22. That the State Board of Regents be provided with adequate funds to staff the office of Executive Secretary of the university system, in order that the work of coordinating the administration of university affairs, now beginning, may be expedited to the benefit both of higher education and the taxpayers of Montana.**

**23. That out-of-state businesses offering educational courses to Montana residents, soliciting trade from Montana residents, and/or accepting fees from Montana residents be required to hold a license, to be issued by the State Board of Education to commercially-operated, out-of-state schools meeting established requirements.**

**24. That penalties for the breaking of contracts by teachers (Section 75-2506, R.C.M., 1947) be extended to include contract violations which occur prior to the opening of school.**

**25. That there be removed from the statutes the present penalty for teachers, of \$100 fine, 90 days in jail, or both, for failure to keep outhouses clean and in repair (Section 75-1632, R.C.M., 1947), and that this responsibility be vested in the Board of Trustees and its custodial employees.**

**26. That at least a basic minimum of guidance instruction be included in the education of all teachers trained in Montana. The shortage of fully-trained guidance personnel for Montana schools is expected to continue, due to many factors including the acute nation-wide shortage. For this reason, and because it is recognized that pupils seek guidance from their classroom teachers, it is**

recommended that every classroom teacher be equipped with a sound knowledge of basic principles of guidance and counseling.

**27. That the Legislature remove the \$6,000 ceiling on teachers' salaries for retirement system purposes.**

No salary ceiling applies to public employees covered by the Public Employees' Retirement System, and it is inequitable that a ceiling exists under the Teachers' Retirement System.

While the last Legislature raised the ceiling from \$5,000 to \$6,000 on the portion of a teacher's salary considered "earnable compensation," action should be taken to remove the ceiling completely as a measure to protect against inflation the future income of retiring teachers.

**28. That the Montana Committee on Teacher Supply continue its work in the direction of evaluating teacher education, with a view of improving Montana's offerings through re-alignment of the teacher education programs of the university units.**

**29. That statutes governing citizenship of teachers be amended to permit elementary and secondary schools to utilize the services of foreign citizens, otherwise qualified to teach, in situations where teachers who are American citizens cannot be obtained.**

The need for this action is especially urgent to assist elementary schools in filling vacancies in foreign language teaching positions which are now going unfilled in some Montana communities where there are local residents available to teach, who would be qualified except for the fact that they have not yet become American citizens. Statutes requiring attention are Sections 75-2501 and 75-4706, R.C.M., 1947.

**30. That statutory guidelines be established to help fulfill the intent of the Legislature in administering school laws where residence, though an essential factor, is now defined inadequately or not at all.**

**31. That the school day and school year be more adequately defined, and that the statute limiting the school day to six hours be amended to make the maximum length of the school day discretionary with the local Board of Trustees.**

**32. That the school laws and motor vehicle laws be brought into agreement on qualifications of drivers of school buses.**

Section 75-3308, R.C.M., 1947, should be amended to require bus drivers to be 21 years of age, in agreement with the requirement for the chauffeur's license.

**33. That increased efforts be made to derive more revenue from state school lands.**

A thorough review of rentals derived from state lands leased for agricultural and grazing purposes should lead to adjustments in rates. It is recommended that adequate staff be provided for the State Board of Land Commissioners to make possible more thorough enforcement of the terms of all types of leases for state school lands.

**34. That the Legislature provide the State Board of Land Commissioners with instructions as to methods to be used in determining the full market value of the exchange of oil and gas leases on state school lands.**

The Land Board, though authorized to exchange old-type leases for new, has not arrived at a method for determining the required "full market value" of an exchange. In other instances involving the determination of market value in the disposition of interests in state lands, the Supreme Court has ruled that the Legislature and not the Land Board must fix the method of arriving at market value.

Prior to the 1959 session of the Legislature, the State Land Board, at the request of the Superintendent of Public Instruction, asked the assistance of the Montana Legislative Council in studying this problem. A recommendation for action was included in the Superintendent's 1958 Biennial Report. As time passes, and a number of old-type leases approach expiration, the Land Board faces the increased probability of many applications for lease exchange. Unless a method for exchange is enacted by the Legislature, it is likely that exploration and further development of state oil lands will be impaired, with a resulting loss of revenue for Montana schools.

**35. That positive action be taken to accelerate the rate of voluntary consolidation of school districts.**

Major obstacles to voluntary consolidation at present are the multiplicity of laws and procedures

pertaining to consolidation, and arbitrary time barriers.

Under present statutes, there are different procedures for at least seventeen types of changes in school district boundaries. The types of change are inadequately defined to the point that it is extremely difficult for local officials to determine, from the law, which type of change corresponds with their intended plan, and which procedures to follow. Because of these ambiguities, local efforts to consolidate frequently are blocked by technicalities, such as those resulting from proceeding under the wrong statute.

It would be extremely helpful to school district officials and residents, wishing to consolidate, if a single, clear-cut procedure were outlined in the law. Such simplification would encourage local people to take action where they have hesitated because of uncertainty. Simplification could be expected to accelerate the rate of voluntary consolidation by removing existing obstacles.

Further, there should be removed from the statutes those time limitations which prevent school district residents from reconsidering the question of consolidation for periods of up to four years. The people should be permitted to consider consolidation at any time they wish to do so, and should not be prevented from voting further consolidation for a period of several years after each boundary change. The present time barrier works to restrict the making of minor boundary changes because of the fear that major changes, contemplated for the future, will be delayed until the expiration of the waiting period.

It is recommended that the Legislature give thoughtful consideration to the adoption of uniform procedures for changes in school district boundaries, eliminating the multiplicity and ambiguity of present laws, and eliminating also the time barriers to change, so that voluntary consolidation may be expedited.

**36. That, in order to encourage voluntary consolidation of school districts, the Legislature consider providing financial incentives to newly-consolidated districts formed under conditions other than those which make consolidation mandatory.**

**37. That conflicts in the laws be eliminated with respect to situations requiring approval of the attendance of pupils at schools located in districts other than the district of residence.**

**38. That more specific criteria be established and additional methods be developed with respect to the classification of schools as "isolated."**

The provisions of Section 75-3617, R.C.M., 1947, are too broad and indefinite to serve the purpose for which they were intended, with the result that nearly every one-teacher school in Montana is classified as "isolated" for Foundation Program purposes.

**39. That obsolete statutes pertaining to teachers' institutes and summer schools be repealed, and replaced by a new provision, in keeping with present-day needs and practices, for an annual teachers' meeting of short duration, called by the County Superintendent. Sections 75-2601 through 75-2608, R.C.M., 1947, should be repealed.**

**40. That obsolete requirements pertaining to reports by the County Superintendent to the State Treasurer be repealed.**

Section 75-3721, R.C.M., 1947, though applicable to a method of distributing state school funds no longer used, is still on the statute books and results in confusion, particularly for new County Superintendents.

**41. That the forty-year-old law setting forth the requirements for publication of the County Superintendent's annual financial statement be amended as to date of publication and content of the statement.**

The present requirement for publication within thirty days of the close of the school year is not in keeping with legal time schedules affecting other reports to which the financial statement relates; also, the present date works a hardship on county superintendents because it falls in the period when school budget deadlines must be met. The contents of the statement should be brought up to date and should follow the fund categories now used by school districts in accordance with present-day school finance laws.

**42. That school district financial data be made available to the County Superintendents in time to permit them to comply with statutes requiring completion of district levy computations before the second Monday in August.**

At present, Section 75-3723, R.C.M., 1947, requires the County Treasurer to make a financial report to the County Superintendent by August 10, which in 1960 occurred two days after the second Mon-

day in August. Section 75-3723, R.C.M., 1947, should be amended to provide for an earlier deadline for this report.

**43. That the Legislature recognize the vast changes which, with passing years, have taken place in the duties of the Office of County Superintendent of Schools, and act to better provide for carrying out the vital responsibilities which these 56 offices have for the financial operation of Montana schools, an enterprise now approaching a \$70-million-a-year business.**

Other states have found it advisable to provide state aid for the Office of County Superintendent, in the form of direct grants for the salaries of county superintendents and staff. It is urgently recommended that the Legislature make a careful review of the duties and responsibilities which it has placed with county superintendents, and, in light of the millions of dollars of school funds involved annually, provide for adequate assistance for their vitally-important offices.

It should be recognized that the salaries of these officials are such that taxpayers no longer can expect to obtain and keep the services of men and women adequately trained both in school administration and financial matters. It should be recognized that few Boards of County Commissioners make adequate provision for competent help for county superintendents. It should be recognized that county superintendents are, in some instances, required to perform their extensive school finance operations without even such basic office equipment as an adding machine or typewriter. It should be recognized further that, in every county, the budgets of all schools are the ultimate responsibility of the County Superintendent and that errors in this office can result in disastrous consequences to the schools, such as withheld local revenues due to protested taxes or ineligibility for state financial aid.

On the whole, Montana's county superintendents have been doing a remarkable job of coping with the responsibilities heaped upon them by succeeding sessions of the Legislature; examples of failure, however, are frequent enough and drastic enough to warrant immediate recognition of the plight of these offices, with accompanying action to provide assistance without delay.

**44. That the complete analysis and review of all school forms, records and data, now in progress, be carried on with the continuing objective**

**of simplifying school records and statistics, improving the adequacy and reliability of educational statistics, and increasing efficiency and economy of administration.**

**45. That a new edition of the school laws of Montana be prepared, to contain more complete information than has been available in the compilations of school laws.**

The new edition should be annotated, as are the Revised Codes of Montana, 1947, to permit reference to the history of statutes, pertinent court decisions and rulings, and should contain a more comprehensive index than has been available.

Sections 75-1305 and 75-1308, R.C.M., 1947, should be amended to remove the requirement that the Superintendent of Public Instruction furnish copies of the school laws to each school district trustee, clerk, superintendent and principal, since the Legislature consistently has denied funds to implement this law.

Further, the Legislature should provide a revolving fund to finance the cost of printing each edition of the school laws and supplements (required by Section 75-1308, R.C.M., 1947), such fund to be replenished from sales of copies, at cost, during the period between printings.

Rather than requiring a new printing every four years, as at present, the statutes should permit an original printing, with subsequent printing of pocket supplements to bring the school laws up to date following each session of the Legislature. This change, while costing slightly more initially, would result in substantial savings in the future.

Action is urgently recommended in 1961, since the quadrennial printing takes place this year.

**46. That the State Curriculum Committee and its subcommittees continue their work in curriculum development.**

Since 1957, tremendous strides have been made toward the goal of bringing Montana's twenty-year-old course of study up to date. The extent of present accomplishments is partially evident from the list of new course guides in Appendix II of this Report. Additional work, now in progress, will appear in the form of tentative course guides later this year.

Because the Legislature has denied funds to employ a Director of Curriculum to accelerate

and coordinate the work of the volunteer curriculum committees, progress has been less rapid than is desirable; nevertheless, the teachers, administrators, and staff members of the university system and Department of Public Instruction serving on the curriculum committees have demonstrated their determination to go ahead with this task—the most vital work in Montana education today.

These volunteer workers deserve the gratitude and commendation of the people of Montana. Recognition should also be given to the local school boards and administrators who have cooperated by making it possible for their teachers to participate in the work of these committees.

**47. That the staff of the Superintendent of Public Instruction be augmented to the degree necessary to carry out all the duties and responsibilities devolving by statute on the Superintendent of Public Instruction.**

That, for this purpose, the following minimum of positions be authorized and/or financially provided for by the 1961 Legislature:

**A. A Supervisor of Health and Physical Education,** to permit compliance with Section 75-2010, R.C.M., 1947. The Superintendent of Public Instruction is presently required by law to appoint such a supervisor, to carry out statutory requirements for health and physical education instruction. An appropriation of sufficient funds for this purpose is requested to meet the requirements which were established by law in 1941.

**B. A Director of School Building Services,** to enable the Superintendent of Public Instruction to discharge the duties prescribed by Section 75-4222, R.C.M., 1947; and to develop maximum efficiency and economy in the use of tax money for school buildings by providing local school boards with advisory aid in planning, constructing and maintaining school plants. The school building problem faces the entire nation; in other states where the problem long has been more acute than in Montana, important strides have been made in achieving maximum value from building dollars. A state school building consultant could assist in effecting essential savings by serving as a source of objective information on current developments, materials and methods, and as a clearing house for exchange of ideas by school boards, so that any board faced with a building program could benefit from the experience of other boards. This new position should be created and adequately financed as an investment in economy.

**C. A Director of School Library Services,** to enable the Superintendent of Public Instruction to fulfill the responsibilities for school libraries stipulated by Sections 75-1316 and 75-3203, R.C.M., 1947. While progress is slowly being made, much improvement still is needed in the state's school library facilities. The Superintendent of Public Instruction's School Library Committee has developed a Guide for Montana School Libraries, but the needs are so great and the state so large that a full-time, paid specialist is essential if Montana school libraries are to have the help required to accelerate progress.

**D. A Supervisor of Conservation Education,** to make it possible to fulfill the duties of the State Superintendent connected with conservation education, as outlined in Sections 75-2013 and 75-2015, R.C.M., 1947, as amended. Since the last Legislature denied funds to pay the Department of Public Instruction's portion of the cost of the conservation education program, which at that time was partially supported by a grant from the Montana Fish and Game Commission, the Commission felt unable to extend its support past the June, 1959 expiration date, and the program of necessity was discontinued. Though in existence only for the two-year period of the Fish and Game Commission grant, the conservation education program made a worthwhile contribution to Montana schools, and indicated, even in that short period, its potential for assisting teachers in the development of effective teaching of conservation principles, practices and values. The position of Conservation Education Supervisor should be adequately financed in order that the program can be reinstated.

**48. That the salary structure of the professional staff of the Department of Public Instruction be revised to provide a more favorable comparison with that of Montana's first class school districts, and that of other state agencies.**

In comparisons with salaries of school superintendents ranging up to \$14,500 and salaries offered by other Montana state agencies as high as \$17,000, the salary schedule of the Department of Public Instruction presents a poor picture.

At present, half of the Superintendent's top-level staff of supervisors are receiving salaries below \$7,500. Most of the top salaries are paid only partially from state funds. Top salaries in the Department of Public Instruction at present are: Deputy Superintendent and Coordinator of the

National Defense Education Act, \$8,500 (combined salary, approximately 25% from federal funds); Director of Financial and Statistical Services and Director of N.D.E.A.—Title X, \$8,100 (combined salary, approximately 40% from federal funds); five supervisory positions at \$8,000 (one salary wholly from self-sustaining program, one salary 50% from federal funds and three salaries from state funds); and three supervisory positions at \$7,600 (each 50% from federal funds).

The salary of the State Superintendent, now \$7,500, becomes \$8,500 beginning in 1961. On a monthly basis, the new salary will be \$708; classroom teachers' salaries in Montana now go to \$994 per month.

The Superintendent of Public Instruction is fortunate in having obtained the services of outstandingly-competent professional people; the present supervisory staff of the Department of Public Instruction is widely regarded as the best ever available to serve Montana schools. That this is true, in spite of the salary schedule, is a tribute to the dedication of the men and women who remain in their present positions despite tempting offers of better pay elsewhere.

While, in education, professional people frequently are willing to overlook salary handicaps for a time in order to perform much-needed service, the State of Montana cannot expect to retain indefinitely the caliber of personnel now in the Department of Public Instruction under circumstances which cause continuing financial sacrifice. The state education office, with its tremendous responsibility for school services, supervision and leadership, should be enabled to compete with local school salary schedules and to present a more favorable comparison with other agencies such as the State Highway Commission and State Board of Health.

**49. That the Office of Superintendent of Public Instruction be removed from partisan politics and that the Superintendent be elected on a non-partisan basis, as are the Justices of the Supreme Court, and that the qualifications for the Office of Superintendent be strengthened to require a substantial background of successful administrative and/or executive experience in education, law, government or private business or profession.**

The Office of State Superintendent has undergone constant development since its establishment. No other elected state official now is charged with

the vast scope of administrative duties resting with the State Superintendent. No other elected state official administers the work of a staff of some eighty persons. In addition, the State Superintendent has a wide range of responsibilities directly affecting 56 county superintendents and some 1,200 boards of trustees.

As the Office of the County Superintendent has changed in character to the extent that many legally-qualified county superintendents consider themselves inadequately trained to carry out their duties, so, in even greater degree, has the nature of the Office of State Superintendent changed to the extent that its duties now would present almost impossible difficulties to all but the most unusual individual who, although meeting the legal qualifications, was experienced only in teaching or in small school administration.

The progress of education in Montana is so closely related to the state education agency that Montana can ill afford the risk of an inadequately-administered state office—a risk which is very real, owing to the comparatively low salary of the office, the absence of adequate safeguards as to executive qualifications, and the reluctance of well-educated persons of substantial background to undergo the experience of political campaigning.

Further, the state education office administers and decides matters affecting school children, parents, taxpayers, teachers, school administrators, school board members, county superintendents and many others of both major political parties. Education should not in any way be affected by partisan politics, and to lessen the changes of future interference of politics in school affairs, it would be desirable to elect the State Superintendent on a non-partisan basis. An additional benefit might well be the added willingness of qualified candidates to participate in a non-political contest, while shunning a partisan primary.

Citizens and groups studying this matter are becoming increasingly aware that, unless some changes are made, Montana may well find itself faced with the kind of crisis which has forced other states to remove from the people the right to elect a State Superintendent, and make the position an appointive one.

**Additional recommendations** are now under study in preparation for possible consideration by the Legislature.

**Conclusion:** The recommendations made here represent only a part of the total need for change and improvement. These recommendations, however, concern some of the most urgent needs, where action for improvement is immediately feasible and upon which action much future progress depends.

The search for ways to improve Montana education must continue, and should be pursued diligently, not only by those serving in positions of official responsibility for education, but by all the citizens of our state.

# EDUCATION STATISTICS

## Introduction

It has been apparent for some time that there is a great need for improved financial and statistical educational data for Montana. Lack of adequate data, and existence of apparently-conflicting data, have presented difficulties not only to the Department of Public Instruction (where administrative decisions often must be based on such data), but also—and even more important—to the Montana Legislature which ultimately is responsible for decisions as to the needs of Montana schools and provisions of means of financing those needs. With Montana schools approaching a \$70,000,000-a-year operation, responsibilities for school finance are more keenly felt than ever before.

While statistics in themselves are mere numbers, statistical information accurately defined and properly organized makes possible the intelligent analysis of existing situations and the prediction of future trends. Without an accurate base for interpretation and projection, school officials and legislators are unable to make adequate plans for carrying out their responsibilities for education.

The need to know, to plan ahead, confronts the legislature at each biennial session. This need can be met only by adequate, accurate financial and statistical data. During the past two years, the Department of Public Instruction has undertaken a program aimed at improving the financial and statistical data pertaining to Montana schools.

Though the need for such improvement was recognized in 1957, the necessity of devoting first efforts to the major task of curriculum revision prevented an immediate beginning on the finance and statistics improvement program. Also, lack of funds to employ additional help with the necessary technical background presented a serious obstacle. Without the assistance of Title X of the National Defense Education Act, it is doubtful that the improvement program could have been undertaken in the current biennium.

The work began in 1959 with a thorough study of all pertinent Montana statutes and a complete analysis of Foundation Program operation. From these studies, two conclusions resulted:

1. Montana's statutory system of school finance, with its interlocking (and sometimes conflicting, often obsolete) procedures involving dozens of officials at the school district, county and state levels, presents tremendous problems of operation. Because of the interlocking aspects of the system, a breakdown at any point creates serious obstacles to the carrying out of the related procedures. The system itself, while not unworkable, is based on the premise of ideal operation, with little or no provision for the realities of human operation. Since children must be educated (and that education financed) whether or not the county assessor completes his work by the statutory deadline, whether or not the county treasurer keeps legally-correct and complete records of school district funds, whether or not the county superintendent or district clerk or any other official fills his statutory obligations, a very predictable situation has come into being: a disregard and lack of respect (ranging from partial to complete) for the statutory system of school financial operations, and particularly for financial accounting and reporting. (This should not be interpreted to mean a deliberate effort to circumvent the statutes; it merely indicates that the statutes are so frequently out of keeping with reality that custom and expediency govern, rather than law.)
2. The individuals who serve in many of the official capacities are often without adequate means of fulfilling their statutory responsibilities. No reflection is intended on any official at any level; indeed, most officials from the district clerks on up, are conscientious, dedicated men and women who do their best, often more from a sense of civic duty than from the standpoint of an employee. Nevertheless, the proper functioning of the offices of district clerk, county superintendent, county treasurer, and so on, demands of the officeholder certain special skills, knowledge and ability. With salary levels (and often working conditions) as inadequate as at present, and with an almost total absence of specialized training among

the available work force in many areas, it has become in some cases virtually impossible (and in many others, highly unlikely) that the jobs can be filled by persons with the necessary background. Here again the fault lies not with the people but with the system. The statutes should not prescribe a system so complex, so difficult of operation that, for many Montana school districts (and some counties), legally-correct operation is beyond any reasonable expectation.

The solution to these problems lies in a thorough revision of the statutes, a task of enormous magnitude requiring the best efforts of many people representing all phases of operation. The groundwork for such a study is now being laid, but no final recommendations can be expected for some time.

Meanwhile, in an effort to improve the working of the present system, the Department of Public Instruction in March, 1960, published the state's first **Handbook of Montana School Finance and Statistics**. Among its contents are definitions of terms, examples of school financing, an explanation of the school budget as the basis of financial and statistical data requirements, an index of key duties of officials responsible for school finance and statistics, a calendar of official duties, complete stepwise directions for preparing the school budget, and numerous other aids to financial procedures.

The **Handbook** also includes and explains a new set of report forms. These are designed for reporting financial and statistical data from the county to the state, as required by present laws. These forms were introduced in the spring of 1960 (with the exception of the district budget form, introduced a year earlier), and were used for the first time to report 1959-60 financial and statistical data, and 1960-61 budget and state aid application data, from the county superintendent to the State Superintendent of Public Instruction.

While it had been evident from data reported in previous years that there were, at the county and district levels, many sources of difficulty in providing the necessary information, the new forms have served to better delineate the difficulties. Consequently, the insights provided by the use of the new forms will be of positive value in formulating solutions.

In the statistical section which follows, data for the year 1958-59 is presented in the same manner

as in the 1958 Biennial Report. Data for the year 1959-60, however, is presented as received from the counties, without attempt at reconciliation of conflicting data or correction of what appear to be obvious errors. The 1959-60 data is so presented, not for the purpose of spotlighting errors, but rather as a means of illustrating what has been pointed out: that the requirements of the present system are such that complete and correct compliance is rare.

Until the **Handbook** was made available to all officials with duties connected with school finance it was felt that perhaps the system itself might be less responsible for failures than the lack of a ready means of understanding and applying the system. Until the Department of Public Instruction provided this thorough guide to proper operation, it was assumed that inadequate direction and assistance at the state level might have contributed to the problems, since few local officials could be expected to make an analytical study of all the statutes and Attorney General's Opinions relating to their duties.

Now that the **Handbook** has been in use for one budget and reporting period, it is more evident than ever that the difficulties presented by the system itself are basically at fault, with the contributing factor of inadequately-equipped personnel, as mentioned above.

Perhaps the greatest single source of difficulty lies with the fact that the same requirements apply to the smallest school district as to the largest. In Montana, 72% of the elementary districts have enrollments ranging from one to forty. Under present laws, the school district with a single, one-room school having annual expenditures of perhaps \$3,500 is required to follow the same procedures as the largest district. While the large district typically has the services of a full-time, professionally-trained business manager, the small district often must depend on the services of an untrained local resident who has taken on the duties of district clerk (at perhaps \$5.00 per month) in order to help out the school, since no one else will take the job. How reasonable is it to expect an individual, with no training in law or finance (or, frequently, in elementary bookkeeping) to undertake the study necessary to perform his duties properly—at \$5.00 per month?

The problems of the office of county superintendent also present serious difficulty. In only a few cases is this office provided with the staff and equipment necessary for carrying out its

myriad responsibilities in school finance and statistics. Too often, the importance of this office goes unrecognized, with the result that the county superintendent (who may have been a successful elementary school teacher but who is rarely equipped with a business or accounting background) not only serves entirely without staff, but even without such basic essentials as an adding machine and typewriter. The latter county superintendents, as well as the former, are required by law to carry out all the details of budget preparation and financial reporting that are prerequisite to the receipt of revenues by the school districts in the county.

As pointed out at the beginning, Montana education is approaching a \$70,000,000-a-year business. The office of county superintendent is without question, the most important single link in the proper financial operation of this enterprise. Both the school districts and the Department of Public Instruction are dependent on the county superintendent for the successful operation of the finance system. In all probability, this fact will continue to be true even after any future revision of the system's procedures. For this reason, it is essential that efforts be made to insure the county superintendents adequate assistance in carrying out their duties—specific, day-to-day assistance beyond the general help which the Department of Public Instruction now is able to provide.

Two possible ways of providing assistance bear consideration: assistance by field personnel of the Department of Public Instruction, or assistance directly in the county superintendent's office.

The first possibility would require the addition of staff to the Department of Public Instruction, since it would be impossible for present finance staff to take on extensive travel assignments in addition to their existing duties. The cost of travel, and the time required merely for traveling, make this possibility less desirable than the second—direct aid for the county superintendent's office. The principle of state aid to the county superintendent's office is well established in other states, and could be utilized in Montana to help counties defray the cost of employing a finance-trained assistant for every county superintendent who desires such help.

This proposal could be implemented as follows:

A business assistant would be selected by the county superintendent, in accordance with certain minimum qualifications established at the state

level. The salary of the assistant would be a variable amount, according to experience and duties, but in no case less than \$4,000 per year.

The assistant would serve as business manager for all districts not having a full-time, paid district clerk or business manager.

The business assistant would occupy a position of liaison between the district and the county offices, and would process all financial and statistical matters after action by the trustees and clerk.

The business assistant would aid the county superintendent in matters pertaining to finance and statistics, and would be available to advise other county officials on the subject of school finance and statistics, when requested.

The business assistant would be given intensive training in school law and financial procedures by the Department of Public Instruction, both at sessions held at Helena, and by Department of Public Instruction staff members upon individual request.

The salary of the business assistant would be paid, two-thirds from state funds and one-third from county funds. A separate legislative appropriation should be made for the state funds necessary. (The amount of state funds for the first year should be \$150,000, or two-tenths of one per cent of the state's annual school business volume.) The county funds should be derived from the county general fund. Adjoining counties with few school districts well might share the services (and salary cost) of a business assistant.

The services of the business assistant could be expected to assist the county in improving school financial record-keeping, in distribution of school funds in accordance with legal procedures, in application for state and/or federal school funds available to districts in the county, in budget preparation, and in numerous related ways, where the presence of a person trained in school law and finance is essential. The services of the business assistant could be expected to assist the state in improving county data reporting (and thus effecting considerable savings in correction time at the state level); in improving communication both of problems and solutions between state and county offices; in assisting with revision of school finance laws by delineation of applicable local factors; and in acquiring an accurate and timely picture of school finance throughout Montana.

It is the responsibility of the Superintendent of Public Instruction to administer the school finance system established by law, and to provide the Legislature with the factual data necessary for its deliberations. While every effort has been exerted to fulfill these responsibilities, adequate means do not now exist to do the job as well as it should be done, especially in view of the millions of dollars of state and local funds annually involved.

The Department of Public Instruction has taken every step possible to improve operations under present circumstances. For example, a system of accounting has been established for the State Public School Equalization Fund; a complete annual audit of all school district budgets has been instituted as a means of insuring proper distribution of state school funds; a method of analyzing the operation of the Foundation Program has been developed, so that it is now possible, for the first time, to review the actual operation of the program in a completed year and to utilize the in-

formation so obtained to make better plans for the future. Departmental operations have been coordinated to provide for improved administration of all the related aspects of school finance and statistics. Every effort has been made to assist school district and county officials through the new **Handbook**, through improved communications, through staff visits to local offices, and through annual conferences of school administrators and county superintendents. But much remains to be done if satisfactory operation of the school finance system is to become a reality. Until the system itself can be made more workable, institution of temporary measures such as those suggested here can help to achieve the immediate improvement that is so urgently needed in the present system and operation. Until this fundamental improvement is achieved, the prospects are limited for improvement of the results—the financial and statistical data which tell the story of current operations and provide the basis for future planning.

## SOURCES OF REVENUE FOR MONTANA SCHOOLS, 1959-60

	Amount	Percent of Total
Local Funds.....	\$45,023,785	69%
State Funds.....	16,069,164	25%
Federal Funds.....	4,090,600	6%
TOTAL.....	\$65,183,549	100%

Table XV.

## EXPENDITURES FROM SCHOOL DISTRICT FUNDS, 1959-60\*

Fund	
I.	General Maintenance and Operation..... \$49,120,569
II.	Transportation <sup>1</sup> ..... 3,787,823
III.	Bus Depreciation Reserve <sup>2</sup> ..... 389,024
IV.	Self-Supporting School Lunch Fund <sup>3</sup> ..... 2,074,949
V.	Elementary Schools Tuition Fund <sup>4</sup> ..... 309,672
VI.	Retirement Fund..... 1,312,836
VII.	Debt Service Fund..... 5,605,832
VIII.	Miscellaneous Federal Funds <sup>5</sup> ..... 228,278
IX.	Building Fund..... 2,666,844
XV.	Adult Education Fund..... 75,536
XVI.	Housing and Dormitory Fund..... 38,010
	TOTAL <sup>6</sup> ..... \$65,183,549

Note: For description of the several School District Funds, with purposes and authorized sources of revenue, see *Handbook of Montana School Finance and Statistics: Expenditure and Revenue Accounting Code*.

\* As reported by County Superintendents; for detail, see Table XXII.

<sup>1</sup> Includes \$116,152 in payments made by one district to another; this amount is shown as an expenditure by both districts. Net transportation cost to be financed thus is \$3,671,671.

<sup>2</sup> Amount added in 1959-60 to Bus Depreciation Reserve Funds of all districts.

<sup>3</sup> Non-tax supported.

<sup>4</sup> This amount is duplicated in the General Fund expenditure amount, since it is reported once as a tuition expenditure by the sending district and again as a general expenditure by the receiving district. Total school expenditures to be financed thus exclude \$309,672.

<sup>5</sup> Federal funds for vocational education and the National Defense Education Act programs.

<sup>6</sup> Excluding duplicated amounts; see footnotes 1 and 4.

Table XVI.

## STATE PUBLIC SCHOOL EQUALIZATION FUND, 1959-60

## Receipts

Appropriation from General Fund.....	\$ 8,094,469
25% Individual Income Tax.....	2,369,409
25% Corporation License Tax.....	1,174,815
U. S. Oil and Gas Royalties.....	885,855
Balance, July 1, 1959.....	1,261
<b>TOTAL</b> .....	<b>\$12,525,809</b>

## Expenditures

Equalization on Foundation Program.....	\$11,234,903
Transportation on Schedule.....	964,638
Transportation Administration.....	12,335
Vocational Education Reimbursement.....	30,000
Vocational Education Administration.....	16,524

## Other Government Services:

Board of Education.....	\$ 10,678	
Board of Equalization.....	83,419	
School Lunch.....	24,837	
Correspondence School.....	39,041	
Visual Education.....	27,767	
Special Education.....	10,297	196,039
<b>TOTAL</b> .....	<b>\$12,454,439</b>	

Table XVII.

## INTEREST AND INCOME FUND, 1959

## Sources of Revenue

Grazing Rentals.....	\$ 398,207
Agricultural Rentals.....	1,430,753
Grazing Fees, State Forester.....	11,167
Interest on Land Sales Contracts.....	189,770
Interest on Bonds and Short-term Certificates.....	55,944
Montana Trust and Legacy Fund Earned Interest.....	1,039,019
Rentals and Penalties on Oil and Gas Leases.....	938,318
<b>Total Earnings</b> .....	<b>\$ 4,063,178</b>

LESS: 5% to Permanent Fund.....	\$ 202,070	
Service Charges and Accrued Interest Paid for Purchase of Bonds and Short-term Certificates.....	21,774	223,844
<b>TOTAL</b> .....	<b>\$ 3,839,334</b>

### Appendix III.

## DUTIES AND RESPONSIBILITIES OF THE SUPERINTENDENT OF PUBLIC INSTRUCTION, ACCORDING TO THE REVISED CODES OF MONTANA, 1947, AS AMENDED

- 75-1303. Serve as executive and administrative head of the Department of Public Instruction.
- 75-1311. Prepare a course of study and prescribe use, for all public elementary and high schools.
- 75-2002. Courses to be taught in public schools.
- 75-4206. Prescribe standards and rules for admission to junior high schools, and junior high school courses.
- 75-2102. Approve course of study for Americanization schools.
- 75-2302. Publish and distribute to all teachers a book on fire dangers prepared by commissioner of insurance.
- 75-2009. Health, physical education and recreation instruction.
- 75-2013. Conservation education to be taught in public schools.
- 75-2015. Integration of conservation education into courses of study.
- 75-2017. Courses of study and credits for applied music.
- 75-2214. Course of exercises for Arbor Day.
- 75-2211. Course of exercises for Pioneer Day.
- 75-2206. Course of exercises for Constitution Day.
- 75-1402. Courses of instruction in discovery and education of the exceptional child.
- 75-5002. Courses of instruction in discovery and education of the handicapped child.
- 75-2607. Course of study for use in summer schools for teachers.
- 75-2011. Supervision of visual aids library.
- 75-4001. Course of study for elementary manual and industrial training.
- 75-1316. Lists of publications suitable for school libraries, prices of publications, and rules for care and use of school libraries.
- 75-1319. Surveys of school facilities.
- 75-4222. Approval of plans and specifications for school houses in second and third class districts.
- 75-4802. Disbursement of school lunch funds.
- 75-4803. Administration of school lunch program.
- 75-4806. Accounts and records for school lunch program.
- 75-4807. Studies of methods of improving and expanding school lunch programs.
- 75-3509. Lists of textbooks filed by publishers, with prices and terms.
- 75-3503. Licensing of textbook suppliers.
- 75-3504. Enforcement of textbook licensing provisions.
- 75-3406. First-aid certificates for school bus drivers.
- 75-3308. Recommendation of regulations for school bus operation.
- 75-3401. Appeal on transportation matters.
- 75-1317. Address public assemblies on subjects pertaining to the public schools.
- 75-2703. Member of Teachers Retirement Board.
- 75-1405. Appointment of exceptional child specialists.
- 75-5102. Supervision of expenditures of funds received from federal government for aid to education.
- 75-5101. Request and accept such federal funds for education as may be available, with governor.
- 75-4004. Grant special manual training teachers' certificate.
- 75-4706. Maintain file of oath of allegiance of public school teachers.
- 75-1724. Maintain records of school district budgets.
- 75-1508. Provide county superintendents with blanks and other materials.
- 75-1313. Advise county superintendents on school matters; provide answers to questions of law; decide appeals from county superintendents' decisions, prescribe and enforce rules for hearings; call annual meeting of county superintendents.
- 75-1526. Receive statistics from county superintendents.
- 75-1524. Check school census, provided by county superintendents, for duplications; advise county superintendents of findings; require corrections.
- 75-1626. Hear appeals from decision of boards of trustees or county superintendents relating to transportation, rent, tuition or board.
- 75-1630. Negotiate with other state superintendents of public instruction in adjoining states with regard to tuition payments for pupils attending school there.
- 75-4139. Approve petitions for establishment of high schools, if warranted upon investigation.
- 75-4201. Establish rules pertaining to reorganization of school system to provide junior high school.
- 75-4148. Grant or withhold approval of establishment of junior high schools.
- 75-4230. Negotiate with other state superintendents in adjoining states for tuition payments of Montana pupils attending high school in such states.
- 75-4233. Approve consolidation of high schools on request of county commissioners.
- 75-4407. Supervise and control junior colleges to same extent as other public schools.
- 75-4403. Consider petitions for establishing junior colleges.
- 75-4405. Notify Board of Education of approval of any petition for a junior college.
- 75-4602. Approve boundaries of high school districts within a county.
- 75-1632. Receive reports from local boards of trustees.

- 75-4231. Prescribe rules and regulations for keeping of books of county high schools, by board of trustees.
  - 75-1307. Provide and keep an official seal.
  - 75-1525. Provide design of seal for county superintendents.
  - 75-1308. Print school laws of Montana and distribute to school officers of the state.
  - 75-1305. Print and furnish all school registers, reports, statements, notices and blanks for schools or school officers; furnish a copy of school law to all school trustees and clerks, superintendents and principals.
  - 75-1304. Maintain records on education, reports, statements, and other articles of educational value.
  - 75-1306. Maintain records of official acts.
  - 75-1310. Publish and distribute biennial report.
  - 75-1309. Report to governor biennially on school information and recommendations.
  - 75-4408. Receive reports from junior colleges.
  - 75-3202. Furnish blanks for annual report on libraries by local boards of trustees.
  - 75-2902. Formulate age and schooling certificate for children under sixteen who are employed.
  - 75-2404. Provide requirements for reports of teachers to county superintendents.
  - 75-2403. Prepare forms for daily registers to be kept by teachers.
  - 75-3405. Prepare contract forms for transportation.
  - 75-3407. Provide school district trustees with a degree of isolation chart for transportation.
  - 75-3413. Provide forms for transportation reimbursement.
  - 75-3414. Prescribe forms for transportation budgets.
  - 75-4502. Print budget forms for use in all counties.
  - 75-1729. Revise budget forms as necessary.
  - 75-1717. Receive emergency budgets from county superintendents.
  - 75-1315. Apportion the state school fund among the counties, and certify to the county superintendents the amount apportioned.
  - 75-3615. Keep complete data regarding the school equalization fund; report to Board of Education the estimate for equalization fund accruals; report to Legislature information concerning disbursement, apportionments and future amount of equalization fund.
  - 75-3611. Consider request for re-opening of a school.
  - 75-3620. Notify each county superintendent of estimate of deficiency in foundation program.
  - 75-4540. Supervise and enforce high school budget act; change forms or statements as necessary.
  - 75-4529. Receive high school budgets.
  - 75-4533. Designate budget supervisors for joint school districts.
  - 75-1312. Prescribe regulations for holding of teachers' institutes and summer schools; prepare lists of instructors for same; attend and assist same; encourage teachers in qualifying themselves for their duties.
  - 75-1303. Appoint deputy, high school supervisor, rural school supervisor, music supervisor.
  - 75-1320. Appoint elementary supervisor.
  - 75-2010. Prepare courses of instruction for elementary and secondary schools in health and physical education, and appoint a supervisor.
  - 75-2006. Determine fees for state correspondence school.
  - 75-2007. Appoint director of state correspondence school; make rules and regulations for conduct of this school.
  - 75-4218. Appoint high school supervisor.
